Dear Sir or Madam:

The settlement should be vacated and rewritten because of Microsoft's recent billing practices. They have become so onerous that only a monopoly could hope to survive. You have not done enough to disassemble this giant of business.

Just look around at their licensing practices for businesses.

I am sorry I did not have more information to give you but this is just a quick note and reflects a recent change in my stance on this settlement. Up until a few weeks ago I really thought you should stop bothering MSFT but no more.

Thank you for your time.

Joseph Parrette
